Autonomous AI Agents in Today's Enterprise: Building Blocks, Use-Case Discussion and Demo

Dimitri Blättler
Strategic Solution Engineer

Dive into today's business applications of Autonomous AI Agents! In this workshop, we'll demystify autonomous agents, exploring what they are and how they're revolutionizing industries with their ability to operate independently and make companies more efficient or open up new ways of working. We'll cover the essential building blocks needed to create agents, experience a live demo and discuss together future use-cases in your industry and line of work.
