Biodiversity – What It Really Means to Invest into a More Nature-friendly Economy

Berit Gehring

Client Portfolio Manager

We've all heard that biodiversity loss has strongly accelerated due to human activities such as deforestation, overfishing, urbanization and pollution. And we all know that this is bad – not just from a morale standpoint – but because half the world's GDP depends on nature and its services. What is much less well understood still is how we can invest into the solutions and in a more biodiversity-friendly way. Especially in the public markets. Join this session to learn about the products and solutions that help to protect or even restore nature, and about those companies leading the transition to a more nature-friendly economy by producing food and goods with lower biodiversity impact.

Berit Gehring is Client Portfolio Manager within Robeco's Thematic Investment Team. Prior to joining Robeco in 2020, Berit headed the Product Specialist team at Credit Suisse Insurance Linked Strategies Ltd, a Zurich-based alternative investment management boutique within Credit Suisse. There, she was working with Credit Suisse's global distribution teams as well as on business development projects. Berit originally joined Credit Suisse in 2008 in the Single Manager Hedge Funds department. Prior to that, she held internship positions with Morgan Stanley in Frankfurt and WestLB in London. Berit holds a Master in International Banking and Finance from the Bayes Business School (formerly Cass) in London and is a CAIA charterholder.
