Environmental Co-Investments:
Pioneer Investing in the Pivotal
Technologies of Tomorrow

Nicolas Thomas

Principal Thematics - Private Equity

We are experiencing gigantic and fast technological progress in the areas of CO2 reduction, pollution monitoring and agri-tech to mention a few. Given the increasing urgency of mitigating climate change, protecting biodiversity and making food supply chains more resilient, these environmental solutions are becoming public policy priorities underpinned by national and international legal commitments. Nicolas Thomas will show you how we identify winning companies in this area and how we construct portfolios. He will do this by presenting exciting company and technology examples in which we are already investing.

Nicolas Thomas joined Pictet in 2018 as Private Equity Investment Manager. His responsibilities include contributing to the analysis, selection and monitoring of private equity funds and co-investment opportunities. Prior to joining Pictet, Nicolas worked for five years in the Private Equity investment team of Emerging Capital Partners where he was responsible for the analysis and execution of direct investments in Africa. Nicolas started his career in the Private Equity department of Rothschild & Cie in Paris in 2013. Nicolas graduated with a MSc in Management specialised in Corporate Finance & Strategy from EM Lyon Business School.
