The world of Super LPs: How can Investors Benefit from Size and Scale? Unified Global Alternatives (UGA) is UBS's Alternative powerhouse, building on the strengths of our leading alternatives manager selection franchises, serving the needs of clients of both divisions, Wealth Management and Asset Management. In combination, UGA manages ~USD 280bn in invested assets, making UBS UGA a top 5 global player and LP in Alternatives. How can UGA support you in navigating Alternatives to the benefit of your investors? More precisely, what is the science behind the UBS approach to Alternatives for our own wealth management clients? In this session, we'll discuss UGA's strategy for alternative investments, how we provide enhanced access to exclusive opportunities, how we believe a comprehensive offering for private clients could look like and explore the flexible toolkit we offer to distribution partners, designed to deliver measurable business impact through top-line growth and bottom-line savings. Additionally, we'll also share some of the concepts we're currently developing and look forward to refining them together with you.
